

PICKLEBALL COURTS

Pickleball, a Sport for All Ages

Pickleball is one of the fastest growing sports in the world and since anyone from children to baby boomers can play, it's easy to understand why. SnapSports surfaces offer the consistent bounce and low amount of ball skid needed for pickleball, while providing an added level of "cush" to ease impact on player's joints.

Only requiring flat concrete (no costly post tension slab), SnapSports surfaces are a great choice to revamp an existing court or for a new construction process. SnapSports surfaces simply snap into place, transforming an old tennis or Pickleball court in just hours, saving your project time and money. Unlike an acrylic surface, a SnapSports Pickleball Game Court requires no additional prep-work or yearly maintenance and with a life expectancy of 15+ years, resurfacing your court is never a concern.
