

DAILY CARE & CLEANING TIPS

How to take care of your SnapSports Athletic Surface

- Do not allow marking shoes on your flooring. Dedicated athletic shoes are suggested.
- Install carpeted runners or mats at the entrances to arrest the dirt, debris and water from shoes and to keep them from being tracked onto your flooring.
- Keep beverages and food off the playing area to avoid spills. Wipe up inadvertent spills immediately.
- Regularly dust-mop your floor with a clean, dry, dust-mop.
- When mopping your floor (*either manually or with auto scrubber*), we suggest Zep Citrus Cleaner. This can be purchased from most hardware / home improvement stores. Do not use more cleaner than recommended on the label as too much cleaner can leave a residue that attracts dirt and is also very slippery when wet.
- Mr. Clean Magic Erasers are effective at removing marks on your flooring. Follow the directions and most marks should come off fairly easily.
- Follow the procedures outlined in the SnapSports Maintenance Procedure for your specific flooring type.
